PROFESSIONAL EXPERIENCE

localDevs

New York, NY, USA

Software Engineer

March 2024 - Present

- Develop and maintain full-stack web applications for the Feed NYC project using JavaScript, Flutter, MongoDB, and NodeJS, ensuring a responsive and user-friendly platform
- Implement a new user authentication system that enhanced security and reduced login times by 30%, leverage OAuth protocols and integrating with Google and LinkedIn APIs.
- Optimize the database queries and refactored backend services, resulting in a 25% reduction in data retrieval times and improved overall system performance.
- Collaborate team including local developers and engineers from New York, to integrate third-party APIs and enhance platform capabilities, improving user engagement by 15%.

CHAD Foundation

New York, NY, USA

Front-End Developer

August 2023 - Present

- Improve website responsiveness and user experience by leveraging Bootstrap and advanced CSS techniques, ensuring adaptability across devices.
- Shorten load times by 50% and facilitated an improved user experience by implementing React-Router and containerization techniques for optimized performance.
- Increase website traffic by 20% by contributing to open source projects related to natural language processing, enhancing the foundation's online presence.
- Streamline data handling processes by utilizing Pandas and SQL, improving the foundation's data analytics capabilities.

castroAI

New York, NY, USA

FullStack Developer

October 2023 - December 2023

- Improve user experience and application performance by developing an event application focused on efficiency, SEO optimization, and scalability using the Next.js framework, containerization techniques, and Python.
- Achieve organized and timely progression of development tasks by managing project workflows effectively through GitHub collaboration.
- Enhance transaction efficiency and user satisfaction by designing a user-friendly application interface that incorporated a secure ticketing and payment system with Stripe integration, SQL for database management, and Pandas for data processing.
